UTAH TEST AND TRAINING RANGE : UTAH

The Utah Test and Training Range (UTTR) is a Department of Defense Major Range and Test Facility Base and provides an ideal location for operational test and evaluation for weapons requiring a large safety footprint. It is the only location capable of supporting the overland testing of cruise missiles.

The UTTR is located in Utah's West Desert, approximately 80 miles from Salt Lake City. Interstate 80 divides the range into north and south sections.

The range is used in a training capacity for air-to-air, air-to-ground inert and live practice bombing and gunnery training by DOD aircrew. UTTR provides a vast area of realistic terrain for world-class test and training scenarios to ensure the warfighter is prepared to deploy at a moment's notice to win any conflict with decisive air and space power. Headquarters UTTR at Hill Air Force Base operates and manages the range.

FAST FACTS

- » Location: **Tooele County, UT (near Tooele)**
- » Land Area: **1.8M acres**
- » Special Use Airspace: **over 19K nautical miles²**
- » Sorties/year: **8,800 Training; 1,101 Testing**
