

Arizona Army National Guard

CAMP NAVAJO: ARIZONA

Built primarily by Native American work crews during the 1940s, Camp Navajo is located on the Coconino Plateau, within heavily forested, grassy hills. The Arizona National Guard has commanded the camp since 1993.

Camp Navajo has two distinct missions. First, capable of supporting battalion size units, Camp Navajo is a premier training

facility for all branches of the military and is the primary maneuver training site for Arizona.

The camp is also a major munitions storage depot. The military services, other federal agencies, and civilian and commercial customers lease storage space at the camp, providing a significant portion of Camp Navajo’s operating funds. Notably, as a major munitions storage facility, Camp Navajo has the distinction of being the only National Guard-run facility subject to foreign nuclear arms inspections under the Strategic Arms Reduction Treaty.

It is estimated that the Arizona National Guard had an economic impact of approximately \$515 million in 2009.

FAST FACTS

- » Location: **Bellemont, AZ (Coconino County)**
- » Land Area: **28,473 acres**
- » Military Personnel: **Approx. 7 staff and 5,000 trainees per year**
- » Civilian Personnel: **Approx. 110**
